

## work&study @ Porsche Informatik

Millions of users every day. 160 solutions. 31 countries, including Italy, on four continents. 700 specialists shaping the digitalisation of the automotive trade. This is Porsche Informatik. Learn more: www.porscheinformatik.com

## Trendsetter and innovation driver

We build on proven state-of-the-art technologies, such as Java, TypeScript and Cloud, as well as on development and operating methods such as Co-Creation and DevOps.

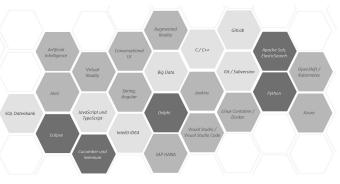

Furthermore, however, we also engage intensively in such as Artificial Intelligence, Big Data, Virtual Reality and Voice Interface.

## What we do

From vehicle financing to parts logistics and services features - the key to success are mobility solutions that guarantee maximum customer satisfaction.

We design our solutions and processes to always meet our customers' requirements. Regardless of the channel they use to search for vehicles or services - we ensure that our systems offer them a seamless experience.

## Come and join our team!

Our package work&study offers practical experience and attractive support for IT students! You are part of a software engineering team at Porsche Informatik. You work 10 to 16 hours weekly, with an annual gross income from 9,295 EUR (10 h) or from 14,871 EUR (16 h). Health insurance is included. And we offer additional free German lessons.
